We checked this book out from the library for our daughter, who was 18 months old at the time. She fell in love with it. We have since checked it out about 15 times, and finally decided just to get our own copy. She is now 2 and a half, and still loves it. She loves counting the different hockey-related items and learning some basics about the sport. Our daughter is half-Canadian and half-American and lives in the US, so this exposes her to some of her Canadian hockey heritage. She can name all of the equipment in the book and loves the word "Zamboni." The book is colorful, sturdy, and whimsical. Love it!!!

This sturdy board book is colorful and fun especially for a 2 year-old boy in my family daycare who is obsessed with hockey right now. We keep it in a special place in our cozy book corner for him. Another 4-year old who is a hockey team drop-out at the moment is rebuilding his interest in playing and this book is a great help and encouragement. I gave them their own copy for Christmas and it has a place in the 2 year-old's crib at home.

Yup, it works for hockey and numbers. Betting it is written by a Canadian though (not a problem, just an interesting side comment). You'll have to buy it to find out why.

As big hockey fans, this was such a great book for our son to learn numbers. It is sturdy and the illustrations are very sweet. Highly recommend it.
