Injection Volume 2

Synopsis

Consulting detective Vivek Headland, originally of the group that caused the release of a haunted artificial intelligence into the world, lives and works in New York, dealing with all the strangeness that very strange city can throw at him. But a case involving a stolen ghost and human deli meat causes him to call for help, as the details of the investigation reveal a new battleground between humanity and The Injection.

Customer Reviews

The writing, the penciling and the coloring are all exceptional. While the first volume was a mix of character backstories and a (gentle) laying out of the plot, this volume throws us right into a complex story where we get to see a three of the five principal characters in action. Viv Headland is the central actor of this volume - his Sherlock Holmes like deductive skills are put on full display here. The interplay between the major characters is interesting and occasionally amusing. This is a team of individuals with exceptional skills that have come together to solve a major problem....that they are responsible for creating a few years earlier while working for the government. Ellis loves his metaphors.

I enjoyed this follow-up volume in the Injection series: the artwork is clear and well-executed and the storyline is reasonably easy to follow at first, although I'd advise reading Volume 1 first. It's difficult to explain what is going on as, like in Volume 1, it's all a bit confusing as the supernatural and science

clash and inter-mingle. This volume can stand alone in terms of its plot which I cannot begin to explain. Fun stuff in its own way.

Had higher expectations after the first one, story line and characters fell short.

You'll love it.
