This was a great book that had so many facts within it. I gave it to my eldest daughter and she was amazed at all of the great facts and figures within it. She loved some of the information and sections specifically on animals and on countries. I have to say that I liked the section on language as it shared quite a few important phrases in multiple languages which was fun. I also found it interesting when I was looking at the section in the book on the systems of the body and all were there except for the reproductive system. I guess they felt that this was a bit adult-oriented, but to me it also seemed like a glaring mistake when everything else was there. Even though this was the case, the book was still a ton of fun. This is definitely a book that will allow your child to be the new cool kid on the block, especially with all of the new information that they can share with their friends!

Have grandson with Asperger's syndrome and he loves facts and figures. This is perfect for him!Thanks so very much!It has lots of pictures all in color.

I love all of these books (Kid's Almanacs)! My 6 and 10 year old boys enjoy reading the fun facts and researching more information on the topics/facts that they find REALLY interesting!! I would recommend to parents with children that don't yet LOVE to read. This will get them really interested in learning more and reading more!
