Synopsis

Young astronauts and astronomers will discover the wonders of outer space in this gorgeous atlas with lots of cool extras to explore! Six giant foldouts contain detailed maps of the moon, the constellations, our solar system, and the universe; a huge diagram of the International Space Station; and a guide to spacecraft. Mini-booklets provide even more in-depth information on a variety of topics, ranging from the phases of the moon to a timeline of Earth's evolution. Along with amazing color illustrations, beautifully detailed charts, and fun facts, Space Atlas also answers such pressing questions as "Are we alone in the universe?" and "Will we ever live on the moon?" to help curious children leap into the unknown
