Grade Level: 5 - 8

Customer Reviews

I received a complimentary review copy of this book. I teach 5th grade math so this is a skill for me with CCSS. This is the skill that my students struggled with last year. I had to reteach to several students. I'm excited to have this as a resource to use this year. It breaks everything down in small steps! I like that it has practice pages to go with each step

This book was a great resource for learning for my 7th -9th grade homeschool children. I received a complimentary review copy of this book and was very pleased with what it had to offer. Great review for my older student, lots of practice both students.

Love! Just what I needed!
