The Exchange Of Truth: Liberating The World From The Lie Of Evolution

Synopsis

For the wrath of God is revealed from heaven against all the ungodliness and unrighteousness of men, who suppress the truth in unrighteousness who exchanged the truth of God for the lie, and worshiped and served the creature rather than the Creator. Romans 1:18-25 Evolution never happened. The best scientists in the history of the world didn't believe in it, so why should you? Men like Newton, Euler, Galileo, Kepler, Bacon, Kelvin and Faraday believed Scripture and science, God's word and His works, were completely compatible and should be studied together. Then Darwin came along and published On the Origin of Species for the purpose of showing that "species had not been separately created" (Descent of Man, p. 62), exchanging the truth of God for a lie and paving the way for a study of science apart from God. Evolutionary thinking has taken a tremendous toll on the lives and minds of many, but there is hope. In The Exchange of Truth, Dr. Shormann shows that with a little thought and a basic understanding of genetics and probability, anyone can liberate themselves from evolution's false worldview. Read the book and learn how.

Customer Reviews

For those of us that were educated in a school system that taught evolution as fact, this book is a must read. It contains essential scientific information necessary to make an informed decision concerning the controversy surrounding evolution.

Dr. Shormann uses scientific evidence and logic to form a well developed argument for creation. Anyone interested in objective scientific support in the creation versus evolution debate should read

this book. This is an excellent scientific resource.

Complete garbage. I wish I could have given it zero stars. I can't believe in the 21st century that people can actually choke down this creationist crap. No wonder this country is falling behind the rest of the world in math and science. Every piece of technology we have is due to science and its application. Science is peer reviewed and self correcting. Creationism is intellectually dishonest and not peer reviewed.

Another book written by a "scientist" that is devoid of fact based deduction or reasoning. If you want to read this for laughs, or maybe just want to see how stunningly stupid some people are, then maybe give it a shot, but there are other works of fiction better suited to these purposes.
