Robots Go Wild!: House of Robots 2 Audibleâ “ Unabridged James Patterson (Author), Chris Grabenstein (Author), Jack Patterson (Narrator), Juliana Neufeld - illustrator (Author), Hachette Audio (Publisher) This is the second book in the Robots Go Wild! Series. Once again we meet up with Sammy and E. In t House of Robots E goes wild. Maddie is sick and cannot attend school. E goes in her place. There is a football game between 5 robots and a bunch of other robots. When a new robot shows up at school for a kid that has to stay home everything goes wrong for E, Sammy and the whole family. E is banned from school, Sammyâ™s mom may be out of a job, his dadâ™s novel may be canceled and Sammy must find a way to save the day. I love this series and think this one is better than book 1. Juliana Neufeld is a fantastic illustrator and Jack Patterson does a great job with the narration. I shared this book with my grandson and he loved it. He has listened to it

three times now.

My first grader, loves this book. Although the target readers are middle school kids, but my son loves reading and gets bored with the books in his class. I saw this book in a store and got it through , as it was cheaper here. My son enjoyed reading and started talking 'Robot'. I am happy with this purchase and would consider buying more books from the author.

My son loves this series of books. He looked forward to reading it every night it was his turn to pick a book. He is looking forward to reading other stories by this author. The story overall is fun for kids, and the plot and pacing kept my son interested and always looking forward to continuing at the end of every chapter.

Verbatim from my 9 year old: This was the best best book I've ever read. You will like it because it shows you how life with robots could be. This book has similarities to my life with my brother. He has cancer and can get sick easily like Mattie. You should really read this book. And that is it. Thank you.

It took my kiddo a little bit longer to get into this particular series, but once he did he loved it. James Patterson has a knack for writing for the school age crowd. Always excited for his new releases.

My son hates reading. It's been a battle since kindergarten. James Patterson is the first author that enticed my son into reading on his own. He loves the books. This one, the middle school series. I love how these books are catering to boys! Such a great series!

This story is about Sammy and his Robots. The main Robots name is "E", which stands for Egg-head. E goes berserk! Maddie suffers from bad germs and she has to stay at home. E is her substitute student. There is a robot football game at school and there's five robots verses a lot of robots. On the other team, one of the robots names was SS10K, and he helps them score 70 goals. When E arrives to play on his team his scores, about 50 goals, and his team wins. The people who would like to read this book would be kids that want to be engineers. Joshua learnt not to make a robot that could go berserk - always check first!

This book took me forever to read because I was reading it to my 4 year old before bedtime. I often

wanted to run off with the book to read ahead, but she wouldn't let me. The big mystery of this book was pretty obvious to me, an adult, but I can see how it would appeal to a younger audience. The language was fairly simple so a young reader or listener could easily understand it as well. My daughter's assessment was that the book was good, but she doesn't want to choose it again for bedtime (probably because I wouldn't let her choose a new book until we had finished this one.) Overall I give it 5 out of 5 stars.
